

### **Remarks**

In response to the restriction requirement mailed March 21, 2003, Applicants elect Group I (methods of inducing immunity to pneumonic pasteurellosis in ruminants, vaccines for reducing morbidity in ruminants, and feeds).

Group I originally contained claims 35-55. U.S. Patent 6,495,145 contains claims corresponding to claims 35-41, 46, and 51 of group I, so independent claims 35, 46, and 51 have been canceled. Dependent claims 42-45, 47-50, and 52-55 also have been canceled and replaced with new independent claims as follows:

old claim	new claim
42	66
43	67
44	74
45	81
47	88
48	89
49	90
50	91
52	92
53	93
54	94
55	95

Dependent claims 36-41 have been amended to be dependent on new claim 66. Dependent claims 68-73, 75-80, and 82-87 mirror dependent claims 36-41.

None of these amendments adds new matter.

Respectfully submitted,

Date: April 21, 2003
